

Newcomer with tradition

DRONANIA

Traditionelle Arzneimittel aus
Bad Wörishofen GmbH

Since 2005 DRONANIA has been partner of the national and international pharmaceutical industry producing pharmaceuticals and food supplements!

The core competence lies with traditional herbal materials, vitamins and minerals. With their modern machinery the contract manufacturer DRONANIA processes and converts these materials to

- * tablets
- * effervescent tablets
- * powder mixtures
- * capsules (rigid gelatine and cellulose)
- * liquids (for internal and external application)

High emphasis is put on the FLEXIBILITY concerning the choice of batch size of contract manufacturing orders.

We produce small batches, test batches and batch sizes dedicated to the big discounters!

Concerning the contract confectioning we offer:

CAPACITIES::

- » solid gelatine capsules: approx. 2 to 3 million capsules/batch
- » tablets: approx. 2 to 3 million tablets/batch
- » powder mixtures: up to 750 kg/batch
- » liquids: up to 6.000 kg/batch

- * blister (PVC-aluminium and aluminium-aluminium)
- * tins (metal, plastic and glas)
- * bottles (glas and plastic)

Tradition: the company's name "DRONANIA" is now 90 years old! Dr. Kleinschrod had been the first balneotherapist of the world famous pastor Kneipp from Wörishofen. In 1919 Dr. Kleinschrod passed his herbal recipes onto Theodor Droste who in 1920 founded the company DRONANIA in Bad Godesberg. In 1978 the business moved to Bad Wörishofen. Until 2004 DRONANIA exclusively manufactured its own products on the basis of these herbal recipes. When the retroactive authorization in Germany expired they stopped producing the herbal tablets. The company was refounded by the Dres. Tittel GbR under the name "DRONANIA Traditionelle Arzneimittel aus Bad Wörishofen".

Newcomer in the market of contract manufacturers

On 15th July 2004 the company commenced business under the token of the traditional name "DRONANIA" with a new management. They had come up with a new business plan: modern GMP-

manufacturing of traditional herbal and standardized herbal pharmaceuticals, generic medicinal products with synthetic APIs, tablets, capsules and liquids as well as the production of food supplements. Today nearly 75% of the turnover is generated by contract manufacturing.

SERVICES:

- » contract manufacturing of pharmaceuticals and food supplements
- » contract packaging
- » Entwicklung neuer Rezepturen (NEM)
- » scientific project management (in coop. with LAT-group)

The premises have been fundamentally renovated, reconstructed and modernised according to GMP rules. Two technical centres for compressed air production, air conditioning technology, ventilation technology, dust abatement and gate systems have been newly constructed. In 2009 the out-dated ventilation system was replaced by modern technologies providing heat recovery.

Between 2004 and 2009 the pharmaceutical machinery has almost been entirely replaced. Today DRONANIA disposes of three separate production cells for solid capsule manufacturing, two production cells for compressing, a clean room for liquid production and filling as well as a liquid mixer with a capacity of 6.000 kg. The technologies for powder and solids have been expanded by a packer unit and a 3D mixer. For packing capsules and tablets a blister conveyor belt with adjacent packaging device had been installed in 2007. The machinery is completed by a packing device for canning solids, effervescent tablets' conveyor belt and another smaller packing line for liquids.

LAT-group

DRONANIA is part of the LAT-group, three companies – one management. (www.lat-group.eu)

As an individual partner DRONANIA cooperates with the LAT Institut für Pharma-Analytik (institute for pharmaceutical analysis), the LAT Gruppe Regulatory Affairs and with Phytovisions GmbH & Co KG. The manufacturer produces batches of testing samples in the context of product development and stability testing. Furthermore, its portfolio contains package designing. Recently DRONANIA received an operating licence to manufacture liquid clinical testing samples for external application. The group's core competence is the close scientific cooperation and project coordination for the customer in the fields of development, analysis and regulatory affairs.

Placing your order at DRONANIA - why? As member of the LAT-group DRONANIA can be a suitable partner in the supply chain of the pharmaceutical industry. High-tech analysis and many years of experience with national and international regulatory affairs / NEM registration can be provided for product development, testing sample production or to support a product launch in a new market. Contract manufacturing and packaging is understood as part of the ensemble!
